

# Los Angeles Approved Commercial Spa Models 2023

## INTRODUCTION

Public pools, including swimming pools, spas, spray grounds, wading pools, and special purpose pools located at apartments, condominiums, gated communities, hotels and motels, public and private schools, health clubs, city and county parks, mobile home parks, resorts and organizations, medical facilities, and water theme parks, are under the responsibility of the Los Angeles County Recreational Waters Program for plan review and approval. Public pools do not include individual therapeutic tubs or baths for cleaning the body, or pools at private single-family homes or dwellings with three units or fewer. This document contains requirements for submitting plans for a public pool in Los Angeles County. It also contains basic requirements of the California pool code.

### **Why are plans required?**

It is important for public health and safety that pools are constructed properly. Plan reviews and approvals are a cost-effective way to ensure that public pools meet the applicable code requirements and are safe. The California Health and Safety Code, the California Code of Regulations Title 22, and the California Building Code Title 24, provide the legal authority and requirements for the safe operation and construction of public pools.

### **When will the plans be reviewed?**

It is the goal of the Recreational Waters program to provide effective and efficient service in public health protection to all our clients. It is our goal to provide initial plan reviews within 20 days of plan submissions. Resubmissions with corrections take priority over new submissions and it is our goal to review them within 14 days.

### **Where can I get information?**

The Recreational Waters website has information, forms, and the fee schedule.  
<http://www.publichealth.lacounty.gov/eh/inspection/pool-plan-check.htm>  
You may also call our main office at (626) 430-5360.

### **Where can plans be submitted?**

Plans are submitted to the Recreational Waters Program at the Environmental Health Headquarter.

Los Angeles County Department of Public Health  
Environmental Health, Recreational Waters Program  
5050 Commerce Dr.  
Baldwin Park, CA 91706  
(626) 430-5360

# Recreational Waters Plan Check Flow Chart

Pool Plans Submitted to:  
Los Angeles County Department of Public Health  
Environmental Health Recreational Waters Program  
5050 Commerce Dr.  
Baldwin Park, CA 91706  
(626) 430-5360

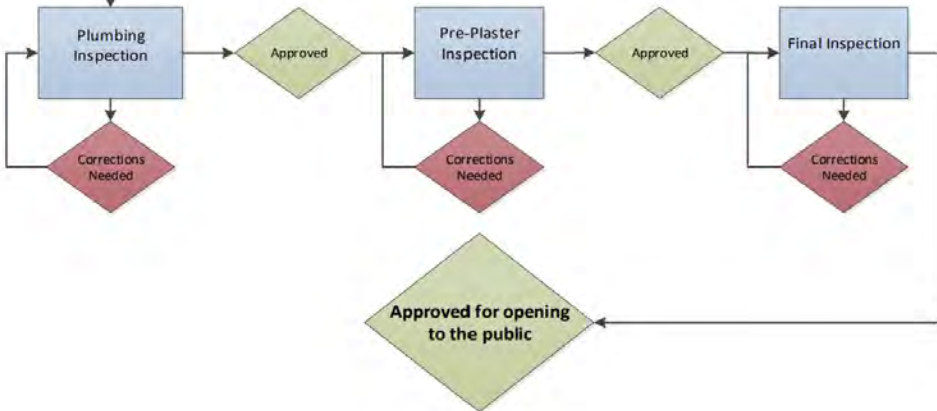

Application and fees will be verified.  
Plans may not be accepted if the  
application is incomplete, or critical  
issues can be assessed at the counter.

Corrections made and  
plans resubmitted.  
Additional fees may be incurred for  
changes made beyond the scope  
of corrections

Plans Reviewed  
and Report Issued

Obtain Building Permits and Commence Construction  
Call at least 5 days before each of the following field inspections  
to make an appointment. Plan approval is valid for 2 years.

A Subsidiary of the International Code Council®

CSI: DIVISION: 13 00 00 – SPECIAL CONSTRUCTION  
Section: 13 17 00 – Tub and Pools

**Product certification system:**

The ICC-ES product certification system includes testing samples taken from the market or supplier's stock, or a combination of both, to verify compliance with applicable codes and standards. The system also involves factory inspections, and assessment and surveillance of the supplier's quality system.

**Product:** Spa Shell (Tile Lined FRP)**Listee:** Nespa Enterprises, Inc.  
2800 Richter Avenue, Suite C  
Oroville, CA 95966  
[www.tiledspas.com](http://www.tiledspas.com)**Compliance with the following codes:**

2021, 2018, 2015, 2012 and 2009 *International Swimming Pool and Spa Code*™ (ISPSC)  
2021, 2018, 2015, 2012 and 2009 *Uniform Swimming Pool, Spa and Hot Tub Code*® (USPSHTC)\*

\*Code is a copyrighted publication of the International Association of Plumbing and Mechanical Officials

**Compliance with the following standards:**

IAPMO/ANSI Z124.7-2013(R18), Prefabricated Plastic Spa Shells  
ANSI/APSP/ICC-3 2014, Permanently Installed Residential Spas and Swim Spas (formerly ANSI/NSPI-3 2014)

**Identification:**

Each unit of Spa Shell shall be marked with manufacturer's name or trademark and ICC-ES PMG mark of conformity. Marking shall be permanent and legible so as to be visible after installation. A label shall be permanently affixed to each unit in a visible location and shall include the manufacturer's name and/or trademark, and model designation. Units manufactured as "Shell Only" shall be so identified and labeled. Unit shall be permitted to be marked "IAPMO/ANSI Z124.7" signifying compliance with the standard.

**Installation:**

Each unit of Spa shell shall be installed in accordance with manufacturer's published installation instructions and applicable codes.

# STANDARD NESPA ABOVE GROUND INSTALLATION INSTRUCTIONS SET-UP AND PREPARATION

**Prerequisites:** Before installing your Nespa spa. You may be required to acquire a permit from your local State, County, and City Building Departments and or Health Department. (Commercial jobs need Health Dept. Approval). Your spa installation must comply with the most current codes. (**International Swimming Pool, Spas & Hot Tub Code 2021 (ISPSC 2021)**).

**Spa drawings:** Nespa Tiled Spas provides current spa specific construction details only. Spa plan, sections, Tile specification, spa plumbing detail. Each project has its own submittal drawings pertaining to spa vessel and plumbing only. Nespa vessels are free standing and supporting. No exterior lateral support is required. All building structural support for spa is by others. Do not rely on any website posted model. (Possibly outdated or custom)

**Delivery Access:** Clearly determine the method of getting the spa to jobsite and into the hole. This may require the use of a crane, forklift, hoist, backhoe and/or manpower etc. Each spa arrives with Spa lifting bolts for crane or rigging connections. This connection point is provided for crane or rigging connection. These eyebolts are removable after delivery.

ABOVE-GROUND The following instructions are general guidelines and may not apply to your specific jobsite conditions. Owner/Contractor to provide spa support structure capable of supporting spa load /weight with water and people. Owner/contractor all plumbing, electrical, control electrical and light connection clearances as required by code. This 10" clearance is to accommodate jet and suction plumbing. This 10" clearance can change or be reduced upon request. Note: skimmer location, this area may have to be larger than 10", if commercial 22".

- 1) **Freeze Climates-** If the spa is to be installed into a vault (typical of freeze climates) a standard clearance from vault wall to wall of spa should be 24" or more. If limited space is available contact Nespa for options. This area around spa is for possible future access to spa plumbing in case of a freeze. Area drain or sump pump in vault is mandatory. **Ask your local installer** for his experienced opinion. Do not hesitate to call us because we want to be sure that your installation progresses as smoothly as possible. If you have questions call us. (530) 534-9910.
- 2) **Hole depth** is determined by spa's outside height dimension. This height may vary depending on if spa has skids or no skids. The spa lip may be finished or non-finished. How is the perimeter deck elevation transitioning to the spa? Focus on the finish surrounding deck elevations, thickness of the finish material on spa upper horizontal lip, equal to lip or under the spa lip. This material can be tile, stone, concrete or brick.
- 3) **Pre-plumb:** Nespa factory installs all fittings, suctions and jets into spa before it goes into the hole. All vessels are factory water tested and plumbing is tested for 48 hours. If there are needs for electrical, bonding or control conduits run them as well before dropping in hole. Connecting a bond wire to the niche would be best practice.
- 4) **Support Pad:** Spa should sit on surface engineered to support the weight of vessel with water and people. Others to provide a level support platform. Support platform design and engineering is the responsibility of owner/contractor. Sweep debris off landing area prior to dropping in hole.
- 5) **Install spa** into the hole on top of support platform. Use the factory support lifting eye bolts provided for

crane, forklift rigging etc. Do not hold onto pipes. Use caution with suction and jet plumbing when lowering into hole. **DO NOT STRESS FITTINGS!** Fill Spa with water and check for leaks prior to backfill.

- 6) **Check site reference** points for proper spa positioning (i.e., squaring to house, garage, etc.).
- 7) **Shim to level spa.** Shim with non-compressible material. Re-square to house, or ref. point.
- 8) **Dry pack under spa support skids**, with cement, the gaps that have been created when shimming spa level.
- 9) **Connect pipes to tees** if spa is pre-plumbed. Installers should properly support your new plumbing from stressing the spas pre-plumbed fittings. After electrical conduit and bond wire is connected to light niche, water test spa before back filling with sand.

**NOTE: All Nespa products are water tested prior to leaving factory.**

### **ELECTRICAL:**

- 1) All electrical connections to spa or equipment shall comply with the most recent national electrical code (NEC), state and local codes.
- 2) Connect electrical conduit to light niche. This work shall be done or reviewed by a licensed electrician.
- 3) To install a spa light you will need to include, inside the PVC conduit to the light niche, a solid #8 coated copper wire. (If you are using brass conduit, internal bond wire is not required.) This bond wire should be pulled with the light cord at the same time. This bond wire needs to be attached to the internal bonding lug of the light niche. An approved encapsulate should be applied to bond wire connection in niche.
- 4) An external #8 copper wire shall be connected to the external bonding lug on the rear of the light niche. This copper wire can then be used for additional bonding requirements (i.e., handrails or any other metallic object within 5' of the spa).

### **PLUMBING:**

- 1) When plumbing a Nespa it is important to properly size the plumbing. We highly recommend that you follow the pump manufacturer's pipe sizing requirements and International Swimming Pool, Spas & Hot Tub Code 2021 (ISCSP 2021).
- 2) We recommend that you consult a pool professional to specify spa plumbing hydraulics.
- 3) The Nespa shells are water tested and pressure tested prior to shipping.
- 4) All plumbing inground or exterior to spa shell should be pressure tested at 35 psi (one hour minimum).
- 5) Fill spa with water and test the system for leaks.

### **WATERPROOFING**

- 1) Waterproofing is the responsibility of owner/contractor. Waterproof Spa Vault or containment structure to have area drain. Nespa does not provide waterproof guidelines, we recommend that owner hires waterproof professionals.
- 2) If spa is free standing on elevated deck or a structure, it is important to fill spa with water and load area prior to installing coping or perimeter decking. If spa is installed in a vault situation an area drain is needed.

**Air Venturi Detail**

From SPA Jet Venturi Tee - 1-1/2"

**NOTE: All Piping to be Schedule 80**

**REQUIRED SIGNS.** All signs shall have clearly legible letters or numbers not less than 4 inches high, unless otherwise noted, fixed to a wall, pole, gate or similar permanent structure in a location visible to all pool users.

**POOL CAPACITY SIGN** - A sign shall indicate the maximum number of pool users permitted for each pool. [In letters and numbers not less than 4 inches high]. The pool user capacity of a spa pool shall be based one pool user for every 10 square feet of pool water surface area. The pool user capacity for all other pools shall be based on one pool user for every 20 square feet of pool water surface area. Pool user capacity requirements do not apply to wading pools or spray grounds

**NO DIVING SIGN.** Signs shall be posted in conspicuous places and shall state, "NO DIVING" at pools with a maximum water depth of 6 feet or less. [In letters not less than 4 inches high].

**NO LIFEGUARD SIGN** - Where no lifeguard service is provided, a sign shall be posted stating, "NO LIFEGUARD ON DUTY." [In letters not less than 4 inches high]. The sign also shall state [in letters not less than 1 inch high], "Children Under the Age of 14 Shall Not Use Pool Without A Parent or Adult Guardian In Attendance."

**ARTIFICIAL RESPIRATION AND CARDIOPULMONARY RESUSCITATION SIGN** - An illustrated diagram with text [not less than 1/4 inch high] of artificial respiration and CPR procedures shall be posted.

**EMERGENCY SIGN** - The emergency telephone number 911, the number of the nearest emergency services, and the name and street address of the pool facility shall be posted. [In letters and numbers not less than 1 inch high].

**SPA WARNING SIGN** - A warning sign for spa pools shall be posted stating, "CAUTION" and shall include the following language [in letters not less than 1 inch high]:

- a. Elderly persons, pregnant women, infants and those with health conditions requiring medical care should consult with a physician before entering the spa.
- b. Unsupervised use by children under the age of 14 is prohibited.
- c. Hot water immersion while under the influence of alcohol, narcotics, drugs or medicines may lead to serious consequences and is not recommended.
- d. Do not use alone.
- e. Long exposure may result in hyperthermia, nausea, dizziness or fainting.

**EMERGENCY SHUT-OFF SWITCH SIGN** - [In letters not less than 1 inch high], a sign shall be posted at the spa emergency shut off switch stating, "EMERGENCY SHUT-OFF SWITCH."

**KEEP CLOSED SIGN** - A sign shall be posted on the exterior side of gates and doors leading into the pool enclosure area stating, "KEEP CLOSED" [In letters not less than 4 inches high].

**DIARRHEA NOTICE SIGN** - A sign [in letters not less than 1 inch high] and in a language or diagram that is clearly stated shall be posted at the entrance area of a public pool which states that persons having currently active diarrhea or who have had active diarrhea within the previous 14 days shall not be allowed to enter the pool water. This sign may be posted with all the other safety signs.
